## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marshall, 2004/0019524 in view of Collins-Rector et al. (6,188,398).

Marshall teaches a method of presenting purchasing information within a DVD having video content comprising the steps of: identifying product within the video content sought to be sold (paragraph 0012), capturing at least one frame of the video content showing the product (Fig. 4 and paragraphs 0029-0030), graphically modifying the frame to enhance the presence of the product (Fig. 4), creating a menu interface with the frame (Fig. 5, element 21), creating a selectable menu button associated with the product, creating a second menu having purchasing information for the product (element 21), the second menu displayed responsive to the activation of the button.

While Marshall teaches essentially all the elements of the claimed invention, Marshall does not allow a user to access information regarding a product from the content of the video feature. On the other hand, Collins-Rector et al. teach such a feature. Accordingly, to allow the user to access information regarding a product from the content of the video feature in the system of Marshall, as suggested by Collins-Rector et al., would have been obvious for one having ordinary skill in the art at the time of the invention. The motivation for such a combination would have been to create an enticing advertising experience.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-36 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
